

# Unleash data's untapped potential with high-scale sharing of lifecycle managed data products

## IBM Data Product Hub

More data,  
more problems?

Each year  
enterprise data  
is growing by <sup>1</sup>  
**42.2%**

## Speed

- Inefficient data sourcing obstructs analytics.
- **Data delivery delays due to IT dependency.**
- Continuous data upkeep due to format changes and staleness.

## Trust

- **Unauthorized access to sensitive data.**
- Poor levels of data quality and reliability.
- Inadequate enforcement of data protection policy.

## Silos

- **Absence of a unified view across systems and tools.**
- Multiple data environments: cloud, on premise, hybrid.
- Diverse source systems and analytic tools using data.

Current ad hoc approaches to acquire and deliver data diminish returns

---

30%

of total enterprise time was spent on non-value-added tasks because of poor data quality and availability.<sup>1</sup>

# Data products

offer speed and efficiency  
for greater returns from  
data and AI initiatives

# Data assets and products

A collection of data and data-related assets tailored for high-scale sharing, offering clear business value, governance contracts, and efficient delivery

# Immediate benefits

30%

lower total  
ownership  
costs <sup>1</sup>

90%

time savings for  
new use case  
implementations <sup>1</sup>

\$1.2 bn

Reduced risk of  
data governance  
burden<sup>2</sup>

Introducing...

# IBM Data Product Hub

Onboard, search,  
access and deliver  
data products across  
your organization...

...Enabling teams to  
work faster and  
more efficiently.

# Key benefits

IBM Data Product Hub  
enables efficient creation  
and delivery of reusable,  
governed data products via  
a dependable marketplace

Simplified data sharing  
and consumption

Establishes an open  
ecosystem strategy

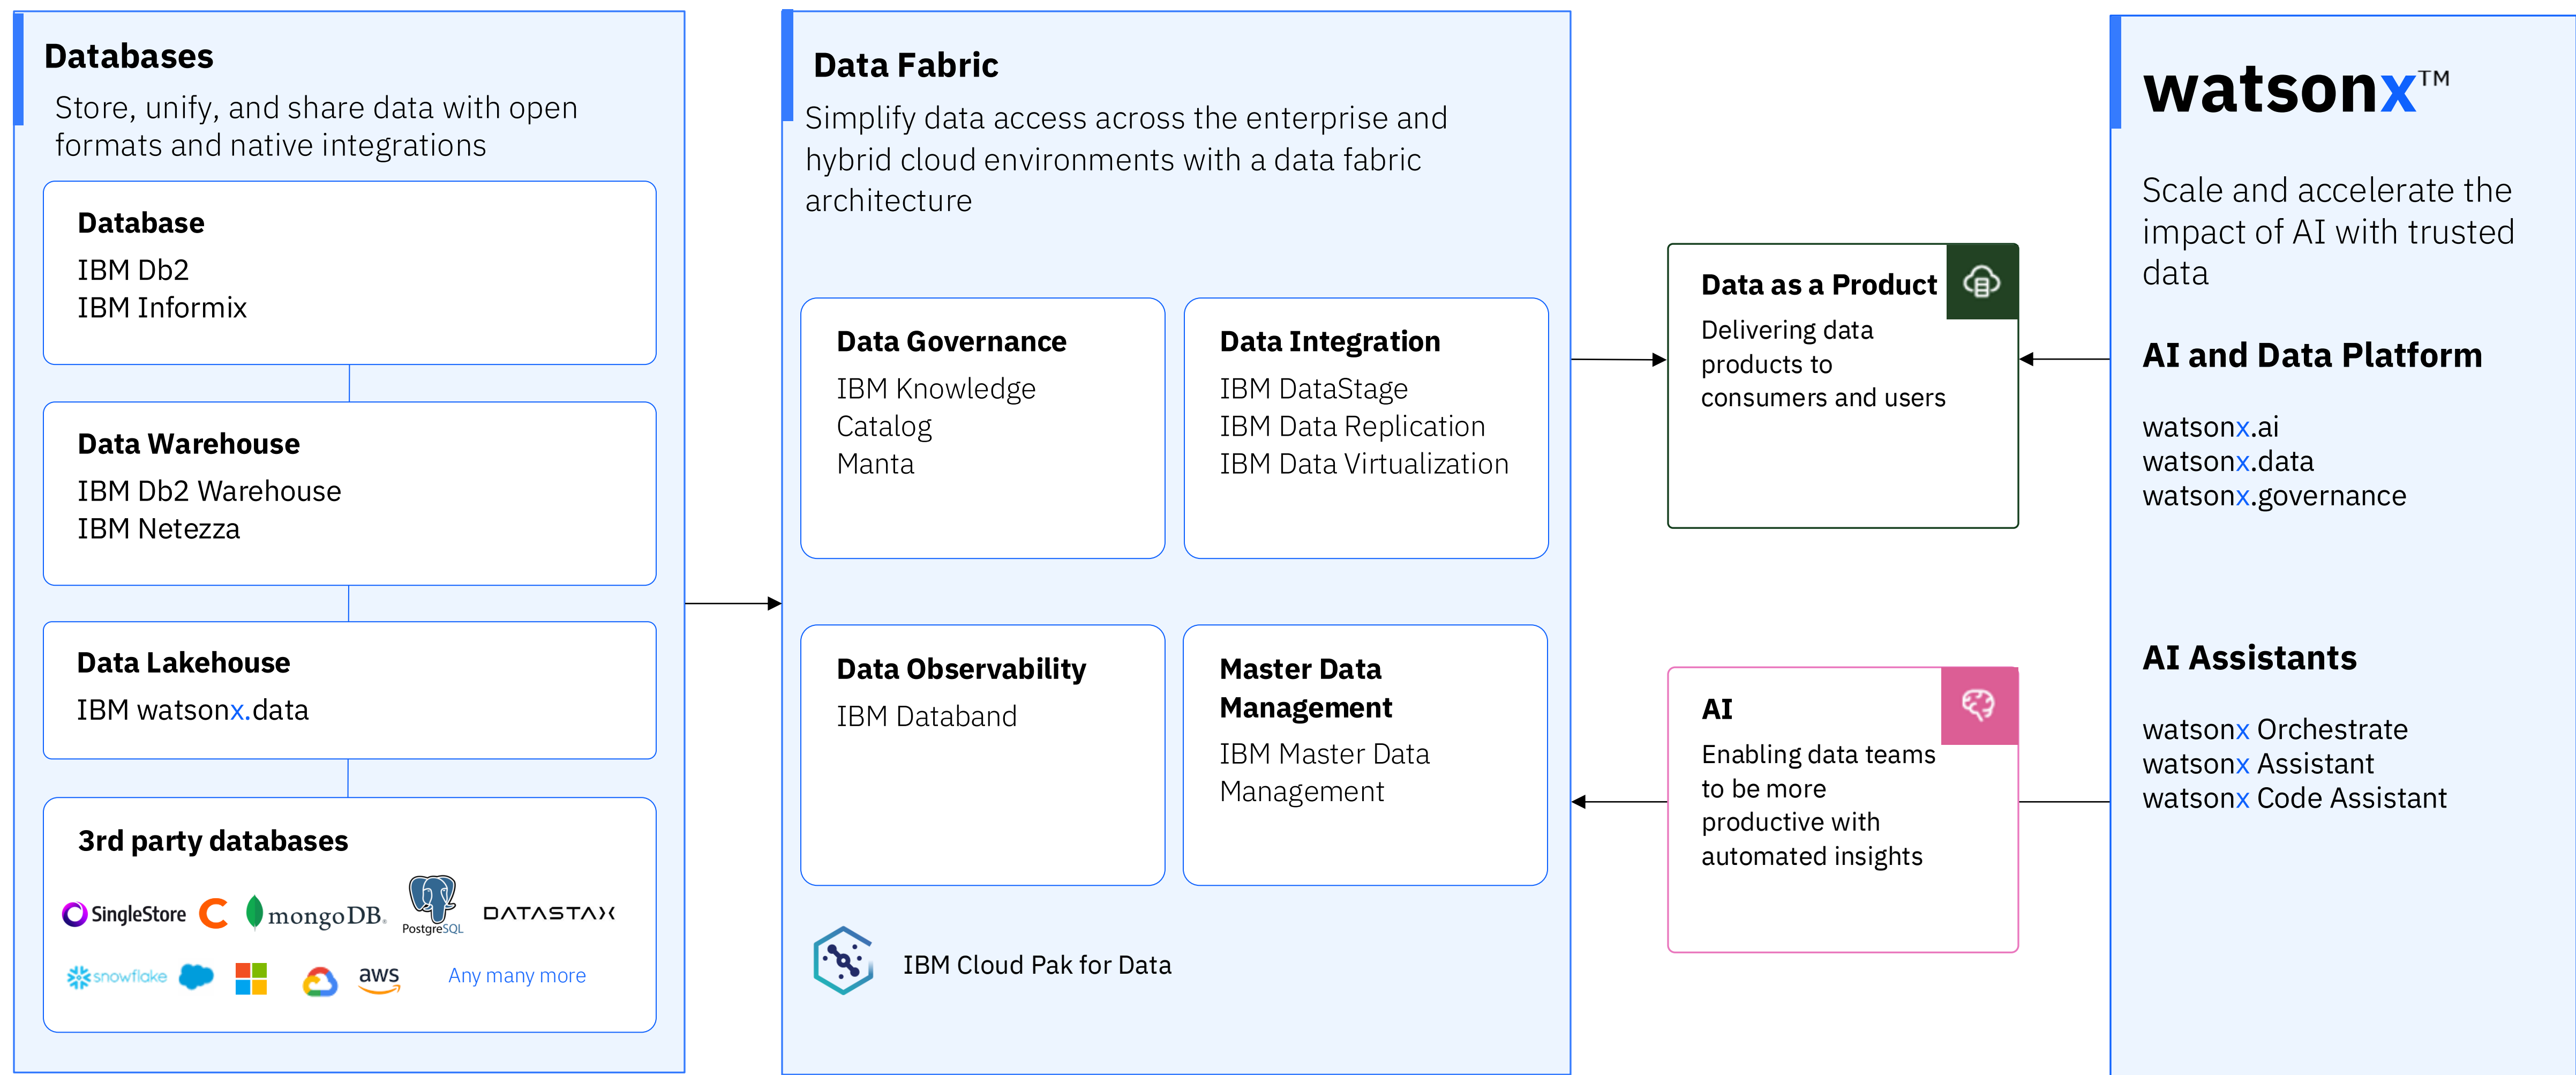

Data product  
lifecycle management

Reusable data products  
across use cases

# Investments in an open and trusted data foundation will accelerate and scale your AI initiatives

Automated data lineage

Gain deeper visibility into your data and its journey from source to end-use for regulatory compliance and AI use cases with Manta, an IBM company
